2017 Screening Levels Table Now Available

March 6, 2017

A link to IDEM's 2017 screening levels tables (Tables A-6 and A-7) is now available on the IDEM Screening and Closure Level Tables webpage at <http://www.in.gov/idem/cleanups/2392.htm>. As noted on page 10 of the *Remediation Program Guide*, a six-month transition period applies to the new tables.

The 2017 version of Table A-6 includes all of the chemicals found in the 2016 table. Table A-6 also contains new entries for the following chemicals: thallium selenite, toluene-2,4-diisocyanate, toluene-2,6-diisocyanate, and o-toluidine (also known as 2-methylaniline). In addition, 1,2-propanediol now appears as phenol, 2-(1-methylethoxy)-, methylcarbamate.

The table incorporates broad updates by the U.S. EPA, including new source data for chemical parameters and toxicity values. Consequently, it reflects several changes in various screening levels. However, all of the changes are of limited magnitude or pertain to chemicals that do not commonly drive risk.

Please direct inquiries to IDEM staff at 317-232-3215.
